

Solution Requirements

Date	15 March 2026
Project Name	FinWise AI
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Users can securely log in and access the FinWise AI platform using a username/email and password.	High
2	Authorization levels	Users can access financial tools (Loan Eligibility, Credit Score Analyzer, EMI Calculator, AI Tips), while only the admin can manage user records and system data.	High
3	External interfaces	Integrates with Claude AI API for AI-powered financial advice and Google Sheets API for secure user data storage and retrieval.	High

4	Transactions processing	Processes user input and generates loan, EMI, and credit analysis results.	High
5	Reporting	Displays financial reports and AI-generated recommendations.	High
6	Business rules, etc.	Loan eligibility is based on salary, credit score, and existing EMI	High
7	Compliance to laws or regulations	Ensures secure storage and privacy of user data.	Medium
8	Other	Provides a simple, responsive, and user-friendly interface.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria

1	Performance & Speed	Generates loan and credit analysis quickly.	Response within 2–3 seconds
2	Scalability	Supports multiple users simultaneously.	Supports 100+ concurrent users
3	Security & Data Privacy	Protects user financial data with secure storage.	Encrypted & secure data storage
4	Reliability & Availability	System should be available with minimal downtime.	99% uptime
5	Usability & Accessibility	Simple, responsive, and easy-to-use interface.	Works on desktop & mobile
6	<i>Other</i>	Easy to maintain and update with new features.	Maintainable & portable
