

Technology Stack

Date	15 March 2026
Project Name	FinWise AI
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side <i>(e.g., React, Angular, HTML/CSS)</i>	HTML5, CSS3, JavaScript	Builds a responsive and interactive user interface with a modern glassmorphism design.

2	Backend / Server-Side <i>(e.g., Node.js, Python/Django, Java)</i>	Google Apps Script	Handles user requests, processes data, and connects the frontend with Google Sheets.
3	Database / Data Storage <i>(e.g., MySQL, MongoDB, PostgreSQL)</i>	Google Sheets API	Stores user details and financial data securely for easy retrieval.
4	Cloud / Hosting / Deployment <i>(e.g., AWS, Azure, Heroku, Docker)</i>	GitHub Pages	Hosts the web application online with easy deployment and accessibility.
5	Version Control & CI/CD	Git & GitHub	Tracks code changes, supports collaboration, and manages project versions.

	<i>(e.g., GitHub, GitLab, Jenkins)</i>		
6	Third-Party APIs / Other Tools <i>(e.g., Stripe, Twilio, Google Maps)</i>	Claude AI API, Google Sheets API	Claude AI provides intelligent financial analysis and personalized recommendations. Google Sheets API stores and retrieves user data securely.
